

M 4300

The M 4300 is a four channels power amplifier capable of delivering up 1600W in total. Each channel has in the rear part a XLR input and a potentiometer on the front to adjust the volume.

The M 4300 has the ability to be configured in 3 modes: stereo, parallel and bridge, thus adapting to any installation.

Its low THD, all the protections and the light weight makes it versatile and portable.

Features:

TA 1 kHz THD <0.5%:

Stereo: 8/4Ω: 4x3000W / 4x400W

Parallel: 8Ω: 2x300W

Bridge: 8Ω: 2x600W

Frequency response: 20Hz-20kHz

Input sensitivity: 1V

S/N relation: 100 dBA

THD: 0.1%

(SMPTE): 0.1%

Input impedance: 20 kHz (Balanced) 10kHz (Unbalanced)

(5Hz-1kHz) Damping Factor: >200

SLEW RATE: 20V/us

Connections: XLR (Input) - BINDING SPOT (Output)

Protections: Soft Start, DC, VHF, AC, Shortcircuit, Limiter, Temperature

Power Supply: 115V/235V AC, 50/60Hz

Dimensions: 483 × 280 × 44mm

Weight: 5 Kg
