

# WC & WAC Series

Wall Controllers

## Professional Wall-Mount Control Solutions for Audio Systems

The WC series offers robust wall-mount controllers for straightforward audio management. Designed for volume adjustment and source selection, these reliable interfaces provide a practical, minimalist solution for localized control in any professional installation.

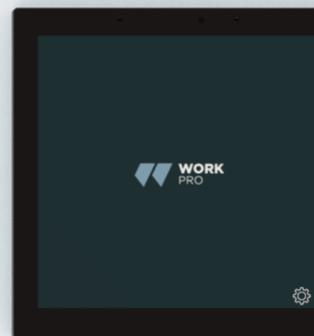

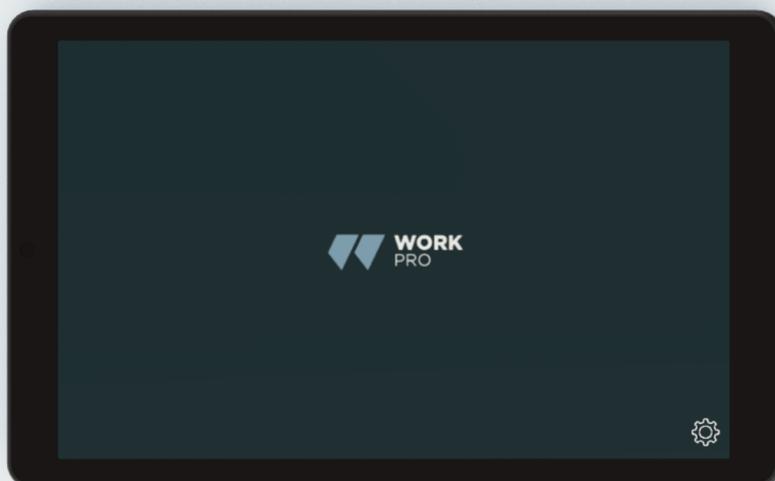

The WAC series features Android-based touch controllers for professional audio. They allow direct management of apps like Spotify and support fully custom layouts, offering a bespoke and elegant control solution for any installation.

### Wall-Mount Touch Controllers with Total Flexibility

The WAC Series introduces a new generation of Android-based wall controllers, designed to offer total flexibility in professional audio environments. These powerful touch-screen interfaces allow for the direct control of popular music streaming apps like Spotify and various media players.

Beyond standard control, the series stands out for its ability to load custom layouts tailored to the specific needs of each installation, providing a truly bespoke user experience that combines aesthetic elegance with advanced functional versatility.

## Minimalist Wall-Mount Control

The WC series provides essential wall-mount control solutions for professional audio systems. These robust and reliable interfaces are designed for straightforward management of volume and signal routing.

Their clean, minimalist design ensures seamless integration into any commercial or residential environment, offering a practical and cost-effective way to put system control exactly where it is needed.
